

Description of practice: pedagogical practice (Third (educational-scientific) level of higher education)

Pedagogical practice in the system of higher education at the third educational and scientific level is a component of professional preparation for scientific and pedagogical activity. Also, it is a type of practical activity of postgraduate students in the educational process in higher education, including teaching special disciplines, organization of postgraduate educational activities, methodical work on specialization 054 - sociology.

The basic for pedagogical practice is the Department of Sociology, to which the graduate student is assigned. In addition, the graduate student can do an internship at similar departments (divisions) of other universities.

Subject of practice: teaching activities in higher education.

The total amount of pedagogical practice is 2 ECTS credits (60 hours). 80% of pedagogical practice time is educational - methodical work (preparation for classes, formation of methodical documentation, attendance and analysis of classes, consultations, management of various activities of graduate students); 20% of the total time of pedagogical practice is devoted to classroom work (lectures and seminars). The terms of the internship and its program are determined in the individual plan of the graduate student, approved by the supervisor, the head of the department to which the graduate student is attached.
